PRINTING

PRINT FROM YOUR MOBILE DEVICE

Submit a print request from any **tablet**, **smartphone**, or **laptop**.

Mobile printing has quickly become one of the most valuable technologies utilized in businesses today. With the popularity and necessity of mobile devices such as iPhones, iPads, Blackberries, Tablets and Androids increasing, users can now easily print their important office documents right from the palm of their hand. Scalable from the largest global organizations down to the smallest local businesses and everything in between, Print To Me Mobile provides everyone in an organization with the flexibility to print on-the-go, and save valuable time.

The majority of IT systems available today are far too complex to allow for the installation of mobile printing software, but with Print To Me Mobile, the set-up is simple and the user experience is straight forward. The power behind Print To Me Mobile lies in its ability to leverage a communication tool we all use in our day-to-day lives: email.

HOW EXACTLY DOES IT WORK?

- 1) With your own mobile device, create an email and attach the document you wish to print.
- 2) Enter our Print To Me Mobile email address as the recipient and hit send. An email will be sent to you confirming the successful delivery of the attached document.
- 3) Once you have reached your office, approach any network-connected printer, input your credentials, and secure release your document from the print queue.
