

TRACKER

A Reform PDC Business Platform Component

What Is Tracker?

Tracker is FabSoft's cost accounting software. This solution allows management level employees to track and maintain printing, scanning and copying activities over a given period. This can keep budgets balanced and to see which departments, if any, are abusing their printing and copying privileges.

Tracker also allows management to gather information seamlessly and smoothly. Accumulating information over a long period of time can be both time consuming & inefficient. Tracker will maintain all information in one centralized location allowing for the production of reports for analysis.

Tracker Categories

When running a successful organization, it is extremely important to keep track of all print, scan and copy activities at all times. FabSoft has a category for all print and copy tracking needs. These categories include:

- Host Line Of Business (LOB)
- Copy
- Work Station
- Print Server
- Mobile Printing
- Scanning
- Faxing
- Archiving
- Desktop Printing

Tracker Categories

Benefits of Tracker

- **Work Station Tracker** -- Monitors & controls print usage at the workstation
- **Desktop Printing Tracker** -- Tracks secure release printing
- **Mobile Printing Tracker** -- Tracks mobile printing
- **Print Server Tracker** -- Monitors & controls usage at the print server
- **MFP Tracker** -- Monitors & controls copy, printing and scanning usage on the MFP
- **HOST Tracking** -- Tracks line of business (LOB) systems

Tracker Components

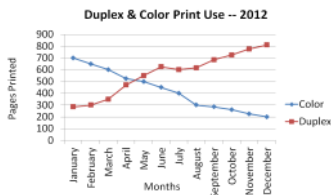

Monitoring

- Retrieve information about print jobs including number of pages, date printed, color, user and other information
- Offer Print management solutions to limit user or group print volume
- Easy remote installation through simple and easy to use deployment tool

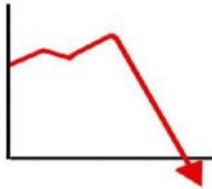

Reporting

- Intelligently gather data into user friendly reports
- Reports are all web based for easy access
- Reports can help identify and eliminate any unauthorized or excessive print jobs

Tracker — Cost Accounting

Trend Analysis: Enable members of an organization's management team to keep an eye on budgets, both for projects and employees. Using this technology, management can see how much entire teams and departments are printing, copying and scanning and if it is up to budgetary standards or being overdone.

Declining Balance: Set up reports to manage printing, scanning and copying capabilities throughout an organization. Should an employee hit a predetermined benchmark, they can not print certain features

Geography Summary Reports: Reports that giving the user the ability to see the printing, copying, and scanning habits of those around them. Users can see the location of the MFP, people's use of the MFP, and the energy produced while copying, printing & scanning

Executive Summary Reports: Reports that allow the user to have a high level view of all the printing, scanning, and copying activities throughout an organization
