**REFORM**  **link**  
An SMB Solution

# *Reform Link: What is it?*

- Reform Link is a single processing unit containing over a dozen workflow automation technologies.
- It is designed to help your SMB (small, medium-sized business) run quickly and efficiently.
- Enhance your day-to-day document processes and leave behind document processing delays, IT headaches, and recurring IT costs.

# *Workflow Software*

## **Features Include:**

- Document Scanning
- Data Capture (from multiple sources)
- Accelerated Document Delivery & Archiving
- Secure Printing
- Mobile Printing
- Variable Data Printing
- Print Tracking/Cost Accounting
- Barcode Processing

# *Easy Set-Up*

- Ready to plug into existing networks
- Internal software components come pre-installed and licensed for use

# *Cut Back on IT Costs*

- Self-contained device; solid state—no moving parts
- Acts as a single server and can handle the demands of your SMB
- Built-in back up
- All included technologies work together seamlessly

# *Keep Your Data Secure*

---

- Maintain confidential information onsite and within reach
- All processed information is encrypted and flows securely through Reform Link
- Lower risk of data security breach
